### HEMATOLOGY REPORT

TEST NAME	RESULT	Unit	Refrence Range	Previous Result
-----------	--------	------	----------------	-----------------

#### Coagulation Profile

#### Prothrombin Time

Prothrombin Time	H 14.6	sec	8.2 - 13.1	20.0
Control (MPPT):	10.9	sec		10.9
Prothrombin Concentration	L 52.6	%	70 - 120	35.0
INR	H 1.34		0.9 - 1.27	1.90

PT concentration results use calibration curve Log-Log with point-to-Point (not linear) Interpolation.

Sample Type: Citrated Plasma

Method: Optical Clot-Based

INR values should only be used when evaluating patients on oral anticoagulant therapy.

Target Therapeutic Values:

INR 2.0 - 3.0 : Prophylaxis of venous thromboembolism, treatment of venous thrombosis (following heparin therapy), prevention of systemic embolism (atrial fibrillation, valvular heart disease, bioprosthetic heart valves, acute myocardial infarction).

INR 2.5 - 3.5 : Mechanical prosthetic heart valves, recurrent systemic embolism.
